AFTER TWO YEARS in my garden, my topiary cat looked like a mangy stray that needed a So I turned to Gail Arnold at Topiaries on 25th Street in Virginia Beach for help. Over the ye This year Arnold is at the top of her form when it comes to making and planting topiaries. SI So when my cat and I arrived at Arnold's shop, she took us through the replanting process : My cat is one of the newer topiary sculptures. Made from a sturdy wire frame and stuffed tig There are two ways to plant or replant them, Arnold said. One, you can plant a pretty, small "With ivy, there's no maintenance," she said. "It gets its nutrients from the ground." The other method is to plant the animal itself, and that's what I wanted to do with my cat. Ar The sedum I brought to plant on my cat has little star-shaped yellow flowers this time of yea "All kinds of sedums do great, though," she said, "and are low maintenance." In addition to a plant, Arnold said to have wet sphagnum moss and wreath pins on hand. Be The wire animals generally come in two pieces and are held together at the center with hoo "The most important thing is that roots are planted in the center of the moss," Arnold said. She loosened the moss around the hole with a screwdriver. "The roots must be able to mar When she unpotted the sedum, she left as much dirt around the roots as she could and still "Cover the roots with a nice little blanket of wet moss." She hooked my cat back together and used wreath pins to hold the plant's stems in place g "Don't feel like you have to cover the whole animal," she said. And she never covers an animal's face with plants, "because it takes the character away," ε In addition to sedums, there are many other plants you can use to plant on topiaries. For ex But, she warned, most other plants will require more water than sedums and other succuler "Mix plants for texture. Experiment with what grows well in the yard and looks cute." As for hens and chicks, think about using them around the edge of a topiary turtle shell or d "Have fun with it," Arnold said.
